FolderSizes

Disk Space Analyzer

For Windows PCs, Laptops & Servers

PERFORMANCE

Analyze vast file systems with ease using our massively multithreaded file system analysis engine.

SNAPSHOTS

Use our powerful file system snapshot capability to build a history of change over time. Generate any report type from a snapshot as if it were a live file system.

SCHEDULE & EMAIL

Schedule file system analysis reports and save them to the file system or deliver them via email.

SEARCH

Build highly customized file system reports with our built-in search tool. Find files and folders by name, attributes, size, owner, age, and more.

The ultimate disk space management tool.

Quickly understand how disk space is being used, and by whom. Visualize local and network storage.

Easily isolate largest, oldest, newest, duplicate, and temporary files. Classify files by type, attributes, owner, age, depth & more.

Analyze disk space usage trends at the disk and folder level. Plan for the future like never before.

Desktop PCs, laptops and servers can quick end up accumulating large quantities of unused, temporary, and duplicate files. Before you know it, you're out of disk space, backups are taking too long to run, users can't find what they need, and you're struggling to plan for the future.

You need a visual, interactive software tool to help you manage disk space. You need FolderSizes. FolderSizes is an awardwinning, network-enabled disk space analyzer for Windows. It can quickly isolate large, old, temporary, and duplicate files, or even show file distribution by type, size, attributes, age, or owner. All with multiple export formats, command-line support, built-in scheduling, and much more.

Under active development since 2003, FolderSizes goes far beyond the capabilities of competing disk space analysis applications by combining several tools into one amazingly powerful application.

Learn why over 30 thousand customers trust FolderSizes to guide their mission-critical disk space reporting and planning processes. Download FolderSizes from our product website for a free 15-Day Evaluation.

Key Metric Software PO Box 1638 Traverse City, MI 49685 sales@keymetricsoft.com http://www.keymetricsoft.com

ANALYZE

FolderSizes reveals dozens of useful statistics, including file and folder sizes, allocated disk space, object ownership, normal and calculated time stamps, and much more.

DISCOVER

FolderSizes offers builtin network share discovery features for servers, storage devices, and even entire domains.

VISUALIZE

FolderSizes offers a stunning array of disk space visualizations, including bar, pie, and amazing tree-map views.

INTEGRATE

FolderSizes can export disk space analysis report data in a variety of file formats, including MS Excel, PSD, HTML, CSV, and TXT.

AUTOMATE

FolderSizes offers not only built-in scheduling support, but also a robust command line interface that makes it easily accessible for scripting and automation.

History & Pedigree of FolderSizes

Since 2003, each successive release of FolderSizes has built upon the impressive feature set of its predecessors, offering an astounding level of value to our customers. FolderSizes provides an immediate return on your investment by allowing you to free up critical disk space with security and confidence.

Trusted by many of the largest organizations in the world, FolderSizes uses an innovative multi-threaded file system analysis engine architecture to scan both local and remote (network) volumes, yielding impressive performance every time you use it. The native 64-bit version allows FolderSizes to scale far beyond other solutions, handling vast file systems with millions of file system objects and beyond. FolderSizes has also been tested thousands of times under the harshest of conditions to ensure a maximum level of accuracy, responsiveness, and stability.

Our experience engineering FolderSizes has made us the undisputed world leaders in disk space analysis and reporting solutions.

There's really no other product like FolderSizes on the market. But don't take our word for it - download FolderSizes today and try it for free in your own environment.

Additional Features

- Powerful scan filtering allows you to decide exactly what gets analyzed.
- Computer view shows all connected and network drives along with disk space usage over time.
- Disk reporter with built-in history tracking and trend visualization.
- Folder reports can be saved as XML, reloaded, and compared allowing you to quickly see what's changed.
- Long NTFS paths are processed correctly by our file system analysis engine, allowing you to find them with ease.
- Multiple scan filtering and search samples are included, demonstrating how to find and remove empty folders, find old unused documents, find long file and folder paths, and more.
- Multi-threaded engine provides unparalleled performance.
- Search and file reports offer built-in file processing. Copy, move, delete, or archive (zip) files to reclaim disk space.
